Borderless Feature Backlog in User Story Format

Scope

This backlog follows the Operating & Business Blueprint and the Phase I MVP/PRD. Phase I proves **Market Access + Trust** for agricultural trade. Later-phase stories remain visible for planning but are explicitly not Phase I commitments.

Epic 0: Manual Validation (Phase 0)

User Story 0.1

As a Borderless operator, I want to manually facilitate buyer-exporter introductions so that we learn where real transactions break.

User Story 0.2

As a Borderless operator, I want to record requirements, documents, logistics needs, financing needs, and outcomes so that product priorities reflect real trade.

Epic 1: Account and Business Onboarding (Phase I)

User Story 1.1

As a business owner, I want to register and create a business profile so that I can join the trusted network.

User Story 1.2

As a business user, I want to select buyer, supplier, exporter, importer, manufacturer, processor, or trader roles so that my workflow is relevant.

User Story 1.3

As a business user, I want to add countries, markets served, product categories, and company information so that counterparties understand my capability.

User Story 1.4

As an administrator, I want to review, approve, reject, or request more information on a business so that the network prioritizes trust before scale.

User Story 1.5

As a business user, I want to see my verification status so that I know how counterparties see my profile.

Epic 2: Market and Counterparty Discovery (Phase I)

User Story 2.1

As a buyer, I want to search agricultural products by category, country, availability, and specification so that I can find relevant supply.

User Story 2.2

As an exporter, I want to discover buyers, markets, demand, and RFQs so that I can find qualified opportunities.

User Story 2.3

As a user, I want to filter companies by role, country, category, and verification status so that I can assess relevant counterparties.

User Story 2.4

As a buyer, I want to view a supplier's profile, products, certifications, and verification status so that I can make a safer introduction.

Epic 3: Product Listings (Phase I)

User Story 3.1

As an approved exporter, I want to publish a structured product listing with quantity, origin, specifications, certifications, and images so that buyers can discover my supply.

User Story 3.2

As an exporter, I want to publish, edit, pause, or archive a listing so that availability stays accurate.

User Story 3.3

As an administrator, I want to moderate product listings so that the marketplace remains credible.

Epic 4: RFQ and Early Negotiation (Phase I)

User Story 4.1

As a buyer, I want to create an RFQ with product, quantity, origin/destination, timing, specifications, and commercial requirements so that suppliers can respond accurately.

User Story 4.2

As a buyer, I want to target selected or relevant suppliers so that my requirement reaches qualified businesses.

User Story 4.3

As a supplier, I want to submit a quotation with price, availability, specifications, and terms so that I can respond to buyer demand.

User Story 4.4

As a buyer, I want to review and compare supplier responses so that I can select a credible opportunity.

User Story 4.5

As either party, I want RFQ status and next actions to be visible so that the opportunity does not stall.

Epic 5: Managed Sourcing and Opportunities (Phase I)

User Story 5.1

As a buyer or supplier, I want to submit a requirement to the Borderless sourcing team so that a human can identify counterparties when the network is insufficient.

User Story 5.2

As a sourcing operator, I want to search, verify, and shortlist counterparties so that I can present qualified options.

User Story 5.3

As an operator, I want to introduce buyer and supplier and create a shared opportunity record so that the relationship has clear ownership and context.

User Story 5.4

As an operator, I want to progress an opportunity through New, Sourcing, Matched, Verified, Introduced, RFQ, Negotiation, and Qualified states so that commercial progress is measurable.

User Story 5.5

As an operator, I want to record next action, notes, and outcome so that the workflow becomes reusable intelligence.

Epic 6: Messaging and Notifications (Phase I)

User Story 6.1

As a buyer or supplier, I want to message around a product, RFQ, or opportunity so that context is not lost across disconnected tools.

User Story 6.2

As a user, I want to receive unread notifications for messages, RFQ responses, matches, and status changes so that I can act quickly.

User Story 6.3

As an operator, I want to participate in a conversation so that Borderless can support managed sourcing.

Epic 7: Admin and Analytics (Phase I)

User Story 7.1

As an administrator, I want to manage users, verification, listings, RFQs, sourcing tasks, and opportunities so that the network remains healthy.

User Story 7.2

As an administrator, I want to review suspicious-activity reports and audit material actions so that trust decisions are accountable.

User Story 7.3

As a product owner, I want to measure registration, verification, listing, search, RFQ, response, introduction, negotiation, qualified opportunity, and repeat activity events so that we can prove liquidity.

Epic 8: Transaction Management (Phase II, not MVP)

User Story 8.1

As a buyer and supplier, I want to convert a qualified opportunity into a quotation, purchase order, contract, and transaction record so that execution is coordinated.

User Story 8.2

As a transaction participant, I want milestones and documents attached to the transaction so that everyone works from one source of truth.

User Story 8.3

As an operator, I want to coordinate payment requirements and exceptions so that transactions can complete safely.

Epic 9: Logistics (Phase III, not MVP)

User Story 9.1

As an exporter, I want coordinated freight, customs, transport, warehousing, insurance, and tracking so that goods can move predictably.

Epic 10: Finance and Intelligence (Phases IV-V, not MVP)

User Story 10.1

As a transaction participant, I want financing options connected to a verified transaction so that capital follows commercial opportunity.

User Story 10.2

As a trade team, I want pricing, market intelligence, risk signals, AI sourcing, forecasting, and analytics so that the next trade is easier than the first.

Deferred from Phase I

Escrow, full transaction execution, integrated logistics, finance products, FX, insurance, advanced AI sourcing, demand forecasting, risk scoring, benchmarking, and multi-sector expansion are roadmap items, not Phase I acceptance criteria.
